

Prime Bid v7.0 Feature Set

- 1. Import from Estimating Software Including Sections and Cost Items**
Import a structured file that is output from Timberline Estimating or MC2-ICE. The import can be a section summary or with cost item details imported into the scope items worksheet for each of the cost categories by scope item.
- 2. Edit Scope Item Worksheets from the Sections Spreadsheet**
Create and Edit Scope Item Worksheets while in the Sections Spreadsheet before assigning the section to a matrix.
- 3. Filter the List of Vendors in the Edit Project Database Window**
Filter the vendors in the project database by the confirmation status and by the plans status or both.
- 4. New CSI Division Based on 6 digits.**
Add a second CSI division list that uses the new six digit format. Allow the current divisions editing window to have both 5 digit and 6 digit editing in the same window.
- 5. Column in Edit Sections for 6 Digit CSI codes**
Add a second column in the Edit Sections window for the six digit format for the existing sections. A section can have a 5 digit CSI code and a 6 digit CSI code.
- 6. Setup Option to Select if the Bid is Based on Old CSI 5 Digits or New CSI 6 Digits**
Add a bid setup option to select a 5 digit or a 6 digit CSI section numbering.
- 7. Allow for Divisions to be 1000, 1400 and 1600 and Automatically Have the Sections Sort to the Divisions (1000-1399 sort to 1000, 1400-1599 sort to 1400, etc.)**
Allow users to have a more defined divisions with automatic division selection based on a range between the newly customized divisions.
- 8. Contact Notes for Project Database Vendors – defaults like “left message”, etc.**
Allow for contact notes for each bid project database. There are default entries and the user can type in a custom note.
- 9. DBE Bid Project Vendor Contact Report – Shows Contact Information**
Create a new report that shows the vendor list sorted by the DBE categories setup in the bid setup with the contact notes for each of the DBE vendors.
- 10. Bid Project Vendor Contact Report**
Create a new report that shows the vendor list and the contact notes for each vendor.
- 11. New Print Engine with Editable Headers & Footers**
Allow the user to place fields or text or graphics in the headers and footers. All of the fields that are currently in Prime Bid and all of the system fields – like page number, date, etc.
- 12. New Print Engine with Sheet Options**
Allow for customizable sheet options; gridlines, fit to page, page breaks for headers, print one row before the next row in multiple pages or print zig zag.

- 13. New Print Engine with Editable Font Selection Option for Print Elements**
Allow for selection of fonts for headers and body text in reports and filters, this includes font size, style and color.
- 14. New Print Engine with Print Preview & Editable Margins**
Allow a print preview window with the ability to change column margins on the fly.
- 15. Assign Filters to a Button in the Sections View**
Allow for a filter to be assigned to a button in the sections view.
- 16. Assign a Graphic and text to a filter button in the Sections view.**
Allow for a graphic to be placed on a filter button in the sections view. Also allow for customized text to be placed on the filter button.
- 17. Edit the Column Headers for each Filter – One Row, Two Rows, etc.**
Change the title for a column (header) to be customized, the length of the title and corresponding width of the column will determine the number of rows in all of the column headings,
- 18. Job Duration in Months in the Bid Setup**
A new bid setup option to have the job duration set in the bid setup.
- 19. Job Duration Drives per Month General Conditions and Markup Calculations**
Display in the status bar on the Summary view the monthly general conditions amount and the monthly amount of markups.
- 20. Job Duration Drives Bond Calculation of x%/month When Duration over x Months**
Allow for an addition to the calculated bond premium of x% (usually 1%) for a duration of over x months (usually 12 months sometimes 24).
- 21. DBE Used Filter change to Add Fields for city, state, license #, type of work.**
Change DBE Used filter to add city, state, license #, type of work.
- 22. Highlight cell value in the sections spreadsheet after Arrowing/Tabbing to a Cell**
This works like Excel and allows for instant editing of a cell in the sections spreadsheet that is editable.
- 23. Allow for a Partial Replication of the Sections from the Base Bid to an Alternate**
The user can select from the list of sections in the base bid to be added to an alternate. This preserves the custom numbering and copies the preliminary values.
- 24. Automatic Change to Preliminary Total when a Preliminary is Changed**
Now when a preliminary number is changed you are asked if you want to change the preliminary bid total, change it so that it updates the preliminary total without asking.
- 25. No Preliminary Value Necessary for Adding a Section to a Matrix**
Select a Section that is in the bid file with one of that section's cost category cells from the Select Sections Window from the matrix editing (Add New Sections) without having a preliminary number. The system will place a \$1 value in the preliminary number when the section is added to the matrix.
